[MS4 questions.pdf](#)

Newt-

See the attached diagram . . . these hypotheticals are drawn from questions that arose with the Ct. River and the Cape Cod folks.

Outfall #1 collects runoff from a road inside the UA and discharges to a stream outside the UA . . . is it part of the MS4 system?

Outfall #2 collects runoff from a road outside the UA and discharges to a stream outside the UA . . . is it part of the MS4 system?

What about the reverse: an outfall collects runoff from outside the UA and discharges to a stream inside the UA?

Outfall #3 discharges to the ground, not to a surface water . . . is it part of the MS4 system?

The Town's transfer station is outside the UA . . . is it subject to the MS4 permit . . . i.e., does it need a SWPPP?

Thanks

Fred
